

RESTORATION PLAN**Planer Building at the Export Plant Site in Libby, Mt.
05 December 2000**

This Restoration Plan (Plan) describes how the Planer Building at the Export Plant in Libby, Mt. will be restored. Power will be restored to the building including 480, 220 and 110 volt service. Three rooms consisting of a restroom, lunchroom and grinding room will be framed to the dimensions as modified and agreed to by Mel Burnette (Millwork West) with David Sinkbeil (URS) on 12-5-00 (see attached Figure 1 for details). The three rooms will be insulated and wired for electrical outlets. Electric heat and lighting will also be installed in the three rooms. A sink will also be installed in the restroom and one toilet will be operational. The grinding room will have a two foot wide closet at each end of the room and will have a ceiling built with 2" X 8" lumber.
